of Southeast Wisconsin

AAA

2025 Pilot Award to Advance Translational Science

Please complete & submit this Intent to Apply form by the indicated deadline. You may use the 'Save & Return Later' button at the bottom of this page.

Fields marked with a red asterisk (*) are required.

Questions? Please contact Renee McCoy, CTSI Pilot Award Program Director, at rmccoy@mcw.edu or Louann Sullivan, Project Coordinator, at lsullivan@mcw.edu.

Detail on Investigator Team

Please complete the following section for each investigator that will be included in this grant proposal.

Please refer to the RFA for details regarding investigator requirements.

REMINDER

This award allows for, but does not mandate, a multiple PI (mPI) model. In cases where a project has multiple PIs, all PIs/mPIs must meet the Principal Investigator eligibility requirements from their respective institution.

Proposals must be inter-institutional: the scientific team must include investigators from at least two different CTSI partner institutions: Children's Wisconsin, Froedtert, MCW, MSOE, MU, UW-Milwaukee, Versiti, (Zablocki) Milwaukee VA. **Please note, this condition is based on the investigator's institution of primary employment. Volunteer appointments do not qualify.** An investigator's "primary institution" is the institution paying >50% of that individual's salary.

- At least one mPI or Co-I **MUST** have a primary appointment at a CTSI partner institution that differs from that of the lead PI to meet the inter-institutional requirements for this Pilot Award.
- All investigators must have a minimum of 1% effort. Cost-sharing is not allowed.
- Community partners or investigators from other academic institutions would be welcome additions to projects as **co-investigators**, but alone do not meet the inter-institutional requirement.
- The Lead PI is responsible for fulfilling reporting requirements as a condition of receipt and continuation of funds. Non-compliance of quarterly, final and/or annual reporting could result in the rescission of funds by CTSI.

See the [RFA](#) for further details.

Investigator Team

Lead PI

Please indicate the **Lead PI** who will be the main point-person for receiving all communications related to the proposed study.

Lead PI First Name *

* must provide value

Lead PI Last Name *

* must provide value

Lead PI Credentials *

Example: MD, PhD, MPH

* must provide value

Lead PI Email *

* must provide value

Lead PI Primary Institution

* must provide value

Lead PI's Division Chief

* must provide value

Study Role

 PI

Additional Investigator Team Members

Please list the additional investigators on your study team. **Begin by naming the investigator that fulfills the inter-institutional requirement.**

Reminder:

- *Proposals must be inter-institutional: the scientific team must include investigators (either mPI or co-I) from at least two different CTSI partner institutions: Versiti, Children's Wisconsin, Froedtert, MCW, MSOE, MU, UWM, Milwaukee VA (Zablocki). Please note, **this condition is based on the investigator's institution of primary employment.** Volunteer appointments do not qualify. The 'institution of primary employment' is the institution that pays greater than 50% of the investigator's salary.*
- *mPIs must have a primary affiliation with any of the eight CTSI partner institutions.*
- *Study personnel such as research assistant, study coordinator, or other staff needed for the conduct of the study may not serve as a Co-Investigator; therefore, should not be listed in this section.*

See the [RFA](#) for further details.

Number of additional investigators on this team

* must provide value

Translational Science Project Details

ALLOWED: Translational Science Projects which are intended to:

- explore possible innovative new leads or new directions for established investigators;
- stimulate investigators from other areas to lend their expertise in research in CTS; and
- provide initial support to establish proof of concept.

NOT ALLOWED:

Traditional research projects, i.e., projects focused on a particular scientific question for a particular target or disease.

Translational Science Project Title *

* must provide value

Translational Science *

Briefly explain how your project adheres to the principles of translational science, particularly generalizability, creativity, cross-disciplinary teams, and promotion of efficiency in research.

* must provide value

1000 words remaining

1000 words or less

Translational Science Abstract *

Provide an abstract summarizing your proposal.

* must provide value

250 words remaining

250 words or less

Applicants must provide verifiable proof that all regulatory applications (IRB/IACUC, etc.) are in at least pre-submission status. If applicable, proof of any non-human subjects designation or approved Public Data Set by the IRB must be provided. Please see [MCW Designated Public Data Sets](#) for more information, if needed.

Will your project involve IRB defined human subject research, including human subject data/specimens? *

All study team members involved in human subject research must obtain [CITI training](#). Proposals that include human subject research must provide CITI certification (or equivalent) **within the grant application**.

* must provide value

- Yes, my study involves IRB defined human subject research; proof that regulatory and facility applications are in pre-submission, submitted or approved status and CITI certification(s) will be provided within the application by the grant application due date.
- My study is considered non-human subject research (NHSR); I will provide IRB documentation confirming this designation.
- No, my study does not involve human subject research

Will your study involve animal subject research?

* must provide value

- Yes, my study involves animal subject research; I will provide proof that regulatory applications are in pre-submission, submitted or approved status by the grant application due date.
- No, my study does not involve animal subject research.

Will your study involve the use of a Public Data Set?

* must provide value

- Yes, my study involves the use of a Public Data Set.
- No, my study does not involve the use of a Public Data Set.

Will your study require working with federal agencies such as NIDA, FDA (e.g., IND, IDE applications) or pharmacological agreements (e.g., clinical trial agreements, material transfer agreements)?

* must provide value

- Yes
- No

Keywords

Please provide as many keywords or phrases that best describe your study and the type of expertise needed for providing a quality review of your proposal. Keywords can describe content and/or methodology. (minimum 4 keywords)

Keyword 1 *

* must provide value

Keyword 2 *

* must provide value

Keyword 3 *

* must provide value

Keyword 4 *

* must provide value

Suggested Reviewers

In order to help us build & enhance our reviewer pool, we ask that you provide names of 3 individuals whom we may invite to be potential reviewers of this or other pilot proposals; **reviewers can be from any institution** and are not limited to being from CTSI partner institutions. This will help us to improve the quality and fairness of reviews for the benefit of all applicants. Thank you very much for your cooperation.

Reviewer 1

Reviewer #1 First Name *

* must provide value

Reviewer #1 Last Name *

* must provide value

Reviewer #1 Institution *

* must provide value

Reviewer #1 Email *

* must provide value

Reviewer #1 Area(s) of expertise *

* must provide value

Reviewer 2

Reviewer #2 First Name *

* must provide value

Reviewer #2 Last Name *

* must provide value

Reviewer #2 Institution *

* must provide value

Reviewer #2 Email *

* must provide value

Reviewer #2 Area(s) of expertise *

* must provide value

Reviewer 3

Reviewer #3 First Name *

* must provide value

Reviewer #3 Last Name *

* must provide value

Reviewer #3 Institution *

* must provide value

Reviewer #3 Email *

* must provide value

Reviewer #3 Area(s) of expertise *
