

CHILD HEALTH MENTORED RESEARCH CAREER DEVELOPMENT PROGRAM

LETTER OF INTENT DUE JULY 24

Program Overview

Program Goal:

To facilitate research and career development of early-stage investigators

- 2-year opportunity with 75% protected time
- Provides supportive environment for trainees to develop skills for continuous improvement in translational research/science
- Accelerates translation of basic science discoveries into clinical care and improvements in population health
- Provides investigators with research training, funds and time to engage in educational opportunities
- Integrates team science into trainees' research development

Program Components

- Didactic coursework
- Participation in Clinical Research Scholars Program
- Personalized Research Career Development Plans
- Regular check-in meetings and progress reports
- Mentorship
 - Individualized support from a mentoring team
 - Peer mentorship opportunities
- Benefits of program completion:
 - Tailored mentoring experience
 - Designated time to enhance research skills
 - Professional development opportunities (leadership, mentoring)
 - Foundational knowledge and skills to transition to independent investigator
 - Networking opportunities

Learn more about the Child Health KL2 program & application process here.

Candidates must demonstrate active participation in a Children's Specialty Practice Unit (SPU)
